EDUCATION

NYU Shanghai

Bachelor of Science in Data Science, Finance Concentration, GPA: 3.58

Shanghai, China

Sept. 2025 – June 2029

EXPERIENCE

Financial Analyst

Next Group

May 2026 – Aug. 2026

Ulaanbaatar, Mongolia

- Gave management clearer visibility into product margins, measured through regular sales and COGS reporting, by querying transaction data in SQL, modeling costs in Excel, and visualizing trends in Power BI

Administrative Assistant

Next Group, “Maybe Pop & Joy” Launch

June 2025 – Aug. 2025

Ulaanbaatar, Mongolia

- Helped take Maybee Pop & Joy from launch to daily operations, covering pricing, cashiering, and sales, by setting product prices and running checkout through the opening phase
- Built the new brand’s early customer presence by running social media marketing and handling customer inquiries
- Set up the store’s operations from systems to shelves by configuring systems and managing stocking and inventory

Sales Analyst

Next Group

June 2024 – July 2024

Ulaanbaatar, Mongolia

- Strengthened relationships with existing suppliers across 5 Chinese cities (Erenhot, Baoding, Tianjin, Beijing, Shanghai) by meeting business partners in person
- Evaluated production quality of current and prospective partners by touring factories and assessing new vendors at trade exhibitions
- Shaped team decisions on product selection and business strategy by contributing consumer-focused insights

Human Resources Intern

Next Group

June 2023 – Aug. 2023

Ulaanbaatar, Mongolia

- Kept employee data accurate and confidential across the HR database by maintaining and updating staff records

LEADERSHIP & ACTIVITIES

President

Entrepreneur Club, Orchlon International School

Sept. 2024 – June 2025

Ulaanbaatar, Mongolia

- Founded the school’s Entrepreneur Club and funded a charity event at a local orphanage by organizing student fundraisers
- Built members’ sales and marketing skills through weekly sessions by leading strategy meetings and assigning member roles
- Delivered club events from plan to execution by personally managing most of the planning and logistics

PROJECTS

Financing | Next.js, FastAPI, PostgreSQL, scikit-learn, Supabase Auth

- Automated categorization of Alipay/WeChat spending exports by building a full-stack ML system that pairs 554+ merchant rules with a trained classifier for unmatched transactions
- Measured honest accuracy on unseen merchants with GroupKFold validation by training a TF-IDF + Logistic Regression model with a calibrated-confidence review queue; shipped a spending and budgeting dashboard, live at financing-one.vercel.app

Earnio | Next.js, Express, Supabase, SwiftUI (iOS)

- Connected Mongolian Gen Z creators with brand sponsorships by building a UGC monetization platform
- Enabled earnings tracking, sponsorship applications, and MNT withdrawals by building a Next.js + Express API on Supabase
- Shipped web and native iOS apps across 208+ commits; live at earnio-mn.vercel.app

ICDS Chat System | Python, Tkinter, Ollama, TextBlob, TCP Sockets

- Built a distributed chat app with an LLM chatbot and TextBlob sentiment analysis using Python TCP sockets
- Extended user engagement with multiplayer games (Snake, Tic-Tac-Toe) and an emoji picker; completed as final course project
